JUST ADD COLORS

spring 2007

FOR THE HP LASER 2550: HPS now offers a new line of media coated specifically for use in the Hewlett Packard 2550 desktop color laser printer.

HPGC: Clear permanent self-adhesive polyester film.

HPGW: Glossy white permanent self-adhesive polyester film.

HPUC: Clear ultra removable film (Clear ultra cling).

HPUW: White ultra removable film (White ultra cling).

for

BAKE ON WATER-SLIDE DECAL PAPER: Use our new bake on decal paper along with the HP 2550 to make extremely durable water-slide decals. Bake or cure these decals onto heat resistant substrates such as: glass, glazed ceramic, porcelain, and metal painted with a heat resistant paint. Curing takes place at around 300°F. This media is intended for use in the HP2550, but may also work in some other HP Laser printers. Item Code: **PAS/Z**.

LASER PRINTABLE HOLOGRAPHIC FILM: We're glad to bring laser printer owners five new patterns or colors of our self-adhesive holographic film. The new patterns are:

LHSD: Star-Dust (Fine specks).

LHGL: Glitter (Small squares).

LHSS: Silver-Shine (Solid silver).

LHBL: Bubbles (Small circles).

LHHP: Hyper-Plaid (Small squares & lines).

INKJET SELF-ADHESIVE BACKLIT FILM: Use this self adhesive media with a light source behind the image to create stunning back lit displays. Available in both 8.5" X 11" and 11" X 17". Item Code: **ABL**.

INKJET STAINED GLASS EFFECT CLEAR FILM: The textured surface of this exciting new media make it ideal for use where a clear film is too transparent, and to add a "hammered glass effect" to your project. Making your letters more pronounced. If self-adhesive is not needed, just leave the clear liner in place. Made in the USA by HPS. Item Code: **IVFT**

SELF-ADHESIVE GOLD and SILVER: Both our inkjet vinyl and laser polyester self-adhesive gold & silver media now feature a new and improved high gloss coating. See page 4 for inkjet, and page 16 for laser.

INKJET GALVANIZED STEEL: Metallic steel in color with a galvanized pattern. This self-adhesive polyester film gives your creation a modern appearance, making it stand out in the digital world. Coated in the USA by HPS. Item Code: **IGS**

HOLOGRAPHIC PATTERNS: Star-Dust (Metallic silver with a rainbow of fine specs) and Hyper-Plaid (Metallic silver with a rainbow of small squares and lines). Coated in the USA by HPS.

FOUR ADDITIONAL VARIETYS OF METALLIC TRANSFER FOIL: Along with our Gold foil we now also offer Green, Blue, Red, and Silver/Chrome foil. Bring your black lettering or art to dazzling life with our transfer foils. For more information see page 23.

Terms and Conditions

Before ordering any media please make sure that you are ordering the correct type of media for your equipment. Some of the media (paper & film) we sell must be used in specific types of computer printers.

Please note: In most cases Laser media will not work in a Inkjet printer, nor is it safe to run some inkjet media through most laser printers.

Most of our special laser media will simply not work when used with an inkjet printer, so please make sure you are ordering the right media.

Terms and conditions regarding BULK orders of printable media (100 sheets or more).

By placing a wholesale or bulk order on our catalog or web site you are agreeing to the terms contained on this page:

- 1) Bulk orders are specially packaged per customer and availability is dependent on the demand.
- 2) Bulk order delivery may take one week, two weeks, or possibly longer.
- 3) Please plan your bulk order in a timely manner to avoid running out of stock while awaiting shipment.
- 4) You are buying directly from the manufacturer and paper/film converter. We try to price our bulk digital media as competitively as possible to allow you a reasonable profit margin when selling your products.
- 5) We are unable to accept return shipments of bulk material unless the material is defective, or the wrong product was shipped.
- 6) If you are unsure how our media may fit your needs or suit your production requirements, please buy a retail package to test the media using your equipment and method of application before ordering a large bulk shipment.

You can check availability and delivery time by calling: 817-489-5249.

For improved customer service, try our new E-commerce website.

Q. I want to make temporary tattoos in relatively large quantities of a few hundred or more at a time. Is your media suitable for this?

A. No. Our tattoo kits are ideal for the hobbyist or anyone who wants to make 20 to 40 tattoos at a time using our transfer adhesive sheets. For quantities of a few hundred or more at once this is an unrealistic approach.

Q. I want to make outdoor labels, but they must last for one or more years.

A. The ONLY way this is possible is to screen print onto vinyl media or film using industrial inks that is certified for this purpose. We now offer waterproof vinyl for inkjet printers and white glossy film for HP laser printers.

Q. I want to use my laser printer to create bumper stickers. Can I use your media for this?

A. Yes. We now offer glossy white film that is printable in Hewlett Packard laser printers. The outdoor life of the sticker is determined by the UV resistance of the laser toner and the wear and tear the label may be subjected to. We therefore encourage the use of an over-laminate with laser printed labels.

Q. I want to use my inkjet printer to create bumper stickers. Can I use your media for this?

A. Yes. Just use our waterproof inkjet vinyl in combination with our over-laminate. The UV resistance of the ink and not the water fastness will be your biggest concern. For longer outdoor life use photo inks or "achievable" inks. It is unrealistic to expect exceptionally long outdoor life from bumper stickers that can be made one at a time for pennies using your desktop equipment. Professional quality bumper stickers are manufactured using industrial UV proof inks and screen printing. Today's inkjet printers offer a much longer outdoor life than was previously possible when using a inkjet printer. So when you consider the quick turn around time and low cost of printing outdoor labels using an inkjet or laser printer, it is a realistic approach.

Q. I want to make ceramic decals and fire them in a kiln using your Aqua Slide paper. Can I use your media for this?

A. No. See the question below. Personal computer printers do not print using over-glaze colors.

Q. I want to make Ceramic Decals. Can I use your paper?

A. Yes. We offer printing machines and over-glaze colors for this purpose. If you are serious about creating ceramic decals, please carefully read the following paragraph to fully understand the concept before calling us for more information. For those unfamiliar with screen printing, additional reading is required and is available from your local library. The term ceramic decal as it is used here refers to an over-glaze decal that must be fired onto porcelain or other manufactured glazed porcelain, ceramic, or stoneware that can be kiln fired to cone 015 (800°C or 1470°F). Decals are simply screen printed using the over-glaze colors supplied in powder form. The colors are mixed with an oil and/or a pasty substance (called medium) to make up the "ink" used in the screen printing process. This screen printing is done onto our PPF water-slide paper and later covered with a supporting film to make up the ceramic decal. A printer such as the HAN1013 must be used to print onto our PPF paper. For a broader understanding of this concept, please check your local library and look for books about screen printing and china painting. If books aren't readily available, you can make an inter-library request.

Q. I'm looking for film to make custom mouse pads. Do you carry this?

A. Yes. Our cold laminate or anti skid floor laminate (Item code: POL) is ideal. The textured finish of this film can be applied over any previously printed substrate and give excellent tracking results for optical mice.

Q. How can inkjet media be waterproof when the ink itself is water soluble?

A. The concept is similar to when fruit juice is spilled onto a white cotton fabric, such as a T-shirt. Dye molecules get trapped in the cotton fibers and can not be removed easily by using a gentle stream of cold water. Often warm water and soap will not even remove the stain.

Q. I want to make dye sub images on ceramic tiles. Can I use my color laser printer and your PAS paper for this?

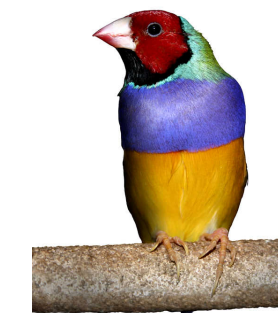

A. No. Ceramic decals and sublimation are two different things. Ceramic decals are made using fritted metal oxide (china paint) which fuses onto the glaze of porcelain and ceramic at 800°C. Dye sublimation is the transfer of dye sublimation ink using low heat onto ceramic ware that has been coated with a polymer film. This process takes place at around 148°C. Printing on the PAS film is a COLD transfer where water is used to slide the carrier film onto the item. This is for decorative use only.

Q. I want to put decals onto ceramic mugs that must be dishwasher safe. Can I do this using your IAS, PAS/2, PAS/N or PAS/Z?

A. No. By baking the new PAS/Z HP Laser water-slide decal in an oven at 345°F for about 15 minutes the decal will stick firmly to the ceramic mug allowing it to be hand washed without the decal coming off. Items decorated in this fashion are not considered dishwasher safe.

JUST ADD COLORS™

Manufacturer of water-slide decal paper for Inkjet printers, laser printers, and photocopiers as well as "waterproof" Inkjet vinyl and cling/tack film for Inkjet printers.

WVF

Inkjet Waterproof Self-Adhesive Vinyl Media

Item Code	WVF	Media Thickness	3.0 Mil	WVF8511G	10 sheets 8.5" X 11"	\$11.45
Type:	Inkjet (Dye based & Solvent)	Liner	96 #	WVF8511KK	100 sheets 8.5 X 11"	\$72.20
Color	Matte White	Total thickness	12.5 Mil	WVF8511KT	1000 sheets 8.5 X 11"	\$636.00
Adhesive	Permanent	Instructions	Included	WVF1117KH	100 sheets 11" X 17"	\$139.45

A perfect media for the manufacture of bumper stickers, temporary, or even permanent outdoor labels. Great for making waterproof and durable production labels for gourmet foods, cosmetics, and hair-care products. This media works well with dye based and solvent based inkjet printers. For best results, we recommend using a printer which uses Epson Durabrite™ inks.

ICT

Inkjet Waterproof Cling Tack Vinyl Media

Item Code	ICT	Media Thickness	3.0 Mil	ICT8511GW	10 sheets 8.5" X 11"	\$11.45
Type:	Inkjet (Dye based & Solvent)	Liner	96 #	ICT8511-25	100 sheets 8.5 X 11"	\$24.95
Color	Matte White	Total thickness	13.0 Mil	ICT8511KH	100 sheets 8.5" X 11"	\$72.20
Adhesive	Ultra Removable	Instructions	Included			

The same media as above but with an ultra low peel tack adhesive. This adhesive allows the media to be removed easily from almost any substrate, even cardboard or paper. Safe for use on delicate substrates where the label must be removed. Tackiness can be rejuvenated on frequently used labels by simply rinsing the label with clean water. We recommend an over-laminate for scratch resistance. Perform tests before starting production for resale, using your equipment and method of printing.

IVFG

Inkjet Glossy Clear Adhesive Vinyl Media

Item Code	IVFG	Media Thickness	3.5 Mil	IVFG8511GC	10 sheets 8.5" X 11"	\$14.65
Type:	Inkjet (Dye based)	Liner	90 #	IVFG8511KH	100 sheets 8.5 X 11"	\$98.60
Color	Glossy Clear	Total thickness	11.5 Mil			
Adhesive	Permanent	Instructions	Included			

Excellent media to use when you wish to make clear production stickers that allow the color and feel of the substrate it is used on to show through. Useable on hard hats, race cars, even special interior wood paneling. Only limited by your imagination!

AWT

Inkjet Adhesive Transparency Film

Item Code	AWT	Media Thickness	3.0 Mil	AWT8511G	10 sheets 8.5" X 11"	\$12.89
Type:	Inkjet (Dye based)	Liner	90 #	AWT8511KH	100 sheets 8.5 X 11"	\$98.00
Color	Glossy Clear	Total thickness	11.5 Mil			
Adhesive	Permanent	Instructions	Included			

Similar to the media listed above but this PET film is slightly more stiff or rigid than the IVFG media.

GAP

Inkjet Gold Metallic Adhesive Polyester Film

Item Code	GAP	Media Thickness	3 Mil	GAP8511G5	5 sheets 8.5" X 11"	\$11.89
Type:	Inkjet (Dye based)	Liner	90 #	GAP8511KK	10 sheets 8.5 X 11"	\$16.65
Color	High Glossy Mirror GOLD	Total thickness	10.0 Mil	GAP8511K100	100 sheets 8.5" X 11"	\$136.00
Adhesive	Permanent	Instructions	Included			

Shiny metallic gold media. Wonderful for printing awards, diplomas, and the like. Works best with black ink, but will also accept colors.

SAP

Inkjet Silver Metallic Adhesive Polyester Film

Item Code	SAP	Media Thickness	3 Mil	SAP8511G5	5 sheets 8.5" X 11"	\$9.89
Type:	Inkjet (Dye based)	Liner	90 #	SAP8511KK	10 sheets 8.5 X 11"	\$14.65
Color	High Glossy Mirror SILVER	Total thickness	10.0 Mil	SAP8511K100	100 sheets 8.5" X 11"	\$119.00
Adhesive	Permanent	Instructions	Included			

Shiny metallic silver media. This media works better for color images than our GAP, yet still makes excellent black images.

Poly Focus Over-laminate

POLYFOCUS™

Over-Laminate is specially designed for digital images printed by inkjet or laser printers.

Polyfocus 1000 Gloss Over-Laminate. 3.0 mil (0.076mm) clear vinyl, flexible, with a permanent adhesive and 53# liner. Economically enhances image clarity, contrast, and brilliance while providing UV protection.

Polyfocus 1100 Satin Gloss Over-Laminate. 3.0 mil (0.0762mm) clear vinyl, with a permanent adhesive, and 53# liner. A popular option for a finish that's between High Gloss and Matte finish while providing UV protection.

Polyfocus 1200 Matte. Over-Laminate. 3.0 mil (0.0762mm) matte clear vinyl, film has a permanent adhesive and 53# liner. Provides the ultimate in non-glare properties while providing UV protection.

Polyfocus 1500 High Gloss Over-Laminate. 2.0 mil optically clear (0.0508mm) polyester with a 1.5mil clear polyester liner. This over-laminate richly enhances image clarity, contrast, and brilliance while providing UV protection.

Polyfocus 1800 Canvas Textured Over-Laminate. 5.5 mil (0.1397mm) canvas embossed vinyl. It has a canvas pattern with permanent adhesive and 90# liner. It gives your digital printed images, optical depth, and canvas texture while providing UV protection.

Polyfocus 1900 Leather Textured Over-Laminate. 4.0 mil (0.1016mm) embossed vinyl. It has a silk satin leather pattern finish, with permanent adhesive and 90# liner. Enhances optical depth and cuts glare. Provides a satin soft fine textured leather finish while providing UV protection.

over-laminate

PFG

Polyfocus 1000 Gloss Over-Laminate

Item Code	PFG9512	Media Thickness	3.0 Mil	PFG9512G	20 Sheets 9.5" X 12"	\$14.65
Type:	UV Over-laminate	Liner	90 #	PFG9512KH	100 Sheets 9.5" X 12"	\$62.45
Color	High Gloss	Total thickness				
Adhesive	Permanent	Instructions	Included			

This gloss finish enhances image clarity, contrast, and brilliance while remaining affordable. Use this excellent over-laminate to not only provide UV protection but also to enhance the visual appeal of your photos and projects.

PFS

Polyfocus 1100 Satin Gloss Over-Laminate

Item Code	PFS9512	Media Thickness	3.0 Mil	PFS9512G	20 Sheets 9.5" X 12"	\$14.65
Type:	UV Over-laminate	Liner	90 #	PFS9512KH	100 Sheets 9.5" X 12"	\$62.45
Color	Glossy Clear	Total thickness				
Adhesive	Permanent	Instructions	Included			

This satin finish is perfect if you want a finish between gloss and matte. Use this excellent over-laminate to not only provide UV protection but also to enhance the visual appeal of your photos and projects.

PFM

Polyfocus 1200 Matte Over-Laminate

Item Code	PFM9512	Media Thickness	3.0 Mil	PFM9512G	20 Sheets 9.5" X 12"	\$14.65
Type:	UV Over-laminate	Liner	90 #	PFM9512KH	100 Sheets 9.5" X 12"	\$62.45
Color	Glossy Clear	Total thickness				
Adhesive	Permanent	Instructions	Included			

This matte finish enhances visual appeal without the glare of gloss finishes. Use this excellent over-laminate to not only provide UV protection but also to enhance the visual appeal of your photos and projects.

PFH

Polyfocus 1500 High Gloss Over-Laminate

Item Code	PFHA9513	Media Thickness	2.0 Mil			
Type:	UV Over-laminate	Liner	53 #			
Color	Glossy Clear	Total thickness				
Adhesive	Permanent	Instructions	Included			

This high gloss finish provides the ultimate in visual enhancement. Use this excellent over-laminate to not only provide UV protection but also to enhance the visual appeal of your photos and projects.

PFC

Polyfocus 1800 Canvas Textured Over-Laminate

Item Code	PFCA	Media Thickness	5.5 Mil	PFC9512G	20 Sheets 9.5" X 12"	\$23.87
Type:	UV Over-laminate	Liner	90 #	PFC9512KH	100 Sheets 9.5" X 12"	\$99.65
Color	Glossy Clear	Total thickness	14.0 Mil			
Adhesive	Permanent	Instructions	Included			

Add visual depth and the texture of canvas to your images with this unique finish. Use this excellent over-laminate to not only provide UV protection but also to enhance the visual appeal of your photos and projects.

PFL

Polyfocus 1900 Leather Textured Over-Laminate

Item Code	PFLA	Media Thickness	4.0 Mil	PFL9512G	20 Sheets 9.5" X 12"	\$23.87
Type:	UV Over-laminate	Liner	90 #	PFL9512KH	100 Sheets 9.5" X 12"	\$99.65
Color	Glossy Clear	Total thickness	13.5 Mil			
Adhesive	Permanent	Instructions	Included			

Provide your images with a satin soft fine leather texture by using this finish. Use this excellent over-laminate to not only provide UV protection but also to enhance the visual appeal of your photos and projects.

HYAZ™
Self-Adhesive Inkjet Vinyl

Hyaz™

In November of 1999, HPS began manufacturing our self-adhesive inkjet vinyl in waterproof matte white, glossy white, and transparent. Our inkjet vinyl is brought to you under our brand name: Hyaz Dallas.

All of our vinyl products are made from quality cast vinyl, with a permanent pressure sensitive adhesive backing. We make "waterproof" white matte vinyl in addition to our white and clear/transparent vinyl. Use our regular vinyl indoors for labels or point of sale displays whether temporary or permanent. Outdoors our regular vinyl can be used with our over-laminate for temporary labels. The life of an outdoor label made with our regular vinyl will depend on the quality of the over-lamination job. Make sure that no moisture will be able to reach the label after the over-laminate is applied. Extend the over-laminate beyond the edges of the label and only apply to flat, non-absorbent substrates such as: automotive paint, chrome, glass, etc. For a longer lasting outdoor label, we strongly recommend the use of our waterproof over-laminate **WOL** (Page 20).

Please go to:
www.papilio.com
For a complete list of our inkjet printable adhesive vinyl

Our waterproof vinyl is much better suited for any outdoor use. We strongly recommend using our over-laminate in combination with our waterproof vinyl to greatly extend the life of your outdoor labels. Over-laminating will NOT give satisfactory permanent results using our regular vinyl media, as moisture will eventually penetrate the over-laminate and destroy the image along with the label.

Inkjet Vinyl Media 8.5" X 11"

- Glossy clear permanent adhesive.....Item # IVFG8511
- Glossy clear ultra removable.....Item #UCFC8511
- Glossy white permanent adhesive.....Item # IVFGW8511
- Glossy white ultra removable.....Item # UCFW8511
- Waterproof matte white.....Item # WVF8511

Manufacturers Recommendations :

To make high quality bumper stickers, outdoor labels, etc we encourage the use of our waterproof vinyl together with our over-laminate.

Before manufacturing:

Always perform tests to ensure full compatibility between your equipment and our media.

UCFC

Inkjet Glossy Clear Ultra Cling Vinyl Media

Item Code	UCFC	Media Thickness	3.5 Mil	UCF8511GC	10 sheets 8.5" X 11"	\$11.25
Type:	Inkjet (Dye based)	Liner	90 #	UCF8511K25C	25 sheets 8.5 X 11"	\$20.25
Color	Glossy Clear	Total thickness	11.0 Mil	UCF8511C-100	100 sheets 8.5" X 11"	\$72.90
Adhesive	Ultra Removable	Instructions	Included	UCF8511CKH5	500 sheets 8.5" X 11"	\$298.57

Our glossy clear ultra cling vinyl can be peeled off of almost any substrate safely, making it ideal for temporary labels of any kind. This media is perfect for making window stickers for the inside of car windows. You can make these labels by printing a mirror image on this media then covering it with a white window film masking spray (Page 18.). After drying, just peel off the liner and the image will be viewed correctly through the adhesive side, and ready for mounting on the inside of any window.

UCFW

Inkjet Glossy White Ultra Cling Vinyl Media

Item Code	UCFW	Media Thickness	3.5 Mil	UCFW8511G	10 sheets 8.5" X 11"	\$11.25
Type:	Inkjet (Dye based)	Liner	90 #	UCFW8511KH	100 sheets 8.5 X 11"	\$20.25
Color	Glossy White	Total thickness	10.5 Mil	UCFW8511K25	100 sheets 11" X 17"	\$72.90
Adhesive	Ultra Removable	Instructions	Included			

The same media as our UCFC but this media is white in color rather than clear.

SCIC

Inkjet Static Cling Clear Film

Item Code	SCIC	Media Thickness	10 Mil	SCIC8511G	10 sheets 8.5" X 11"	\$12.85
Type:	Inkjet (Dye based)	Liner	10 pt	SCIC8511K25	25 sheets 8.5 X 11"	\$20.25
Color	Glossy Clear	Total thickness	17.5 Mil	SCIC8511KH	100 sheets 8.5" X 11"	\$84.60
Adhesive	N/A	Instructions	Included			

Quality inkjet printable clear static cling media. For use on substrates such as glass and glossy finished metals. It is important to note that this media must be used indoors, and will not stick to cold glass. If you need cling media for automobiles or outdoor use we recommend our UCFC or UCFW media.

SCIW

Inkjet Static Cling White Film

Item Code	SCIW	Media Thickness	10 Mil	SCIW8511G	10 sheets 8.5" X 11"	\$12.85
Type:	Inkjet (Dye based)	Liner	10 pt	SCIW8511K25	25 sheets 8.5 X 11"	\$20.25
Color	White	Total thickness	17.0 Mil	SCIW1117KH	100 sheets 8.5" X 11"	\$84.60
Adhesive	N/A	Instructions	Included			

The same quality media as our SCIC but in white. White media is ideal for when you need the label to stand out against the substrate you are applying it to, such as glass doors.

IVFT

Inkjet Clear Textured Self-Adhesive Film

Item Code	IVFT	Media Thickness	3.5 MIL	IVFT8511GC	10 sheets 8.5" X 11"	\$14.65
Type:	Inkjet (Dye based)	Liner—Clear	12 Mil	IVFT8511KH	100 sheets 8.5 X 11"	\$78.45
Color	Textured Glossy Clear	Total thickness	9.0 Mil			
Adhesive	Permanent	Instructions	Included			

Adds a unique hammered glass texture and look to your projects, enhancing the visual depth of the colors. The liner provided with this media is clear, so you can either remove it and use the adhesive, or leave the liner in tack if adhesive is not needed.

IGS

Inkjet Galvanized Steel Metallic Self-Adhesive Film

Item Code	IGS	Media Thickness	3 Mil	IGS8511G	10 sheets 8.5" X 11"	\$11.45
Type:	Inkjet (Dye based)	Liner	90 #	IGS8511KK	100 sheets 8.5 X 11"	\$93.20
Color	Galvanized Steel Pattern	Total thickness	9.5 Mil			
Adhesive	Permanent	Instructions	Included			

A glossy metallic film (not paper) with a galvanized steel pattern. Perfect for giving both your text and photos a modern and unique look. Use our galvanized steel film and stand apart from the crowd.

Metallic Heat Transfer Foils

Our rainbow of metallic transfer foils are the ideal accent to bring your awards, diplomas, invitations, or even production labels to dazzling life. Make your crafts stand out!

To use our Metallic Heat Transfer Foils, print an image with your black and white laser printer, then transfer the metallic foil to the image by using either a hot laminator or even a common domestic iron.

Total Thickness: 0.5 Mil

Even if you do not have a conventional black and white laser printer, you can still use our Heat Transfer Foils, however you will first need to photocopy the image, then tape the foil to the photocopy and proceed as normal.

Where do you add colors?

Send us a picture of your project made using our media and you could win a \$50 HPS gift certificate to use for buying your favorite HPS products*.

We would like to see what your imagination and our media can accomplish together. The possibilities are endless.

- ✓ Personalized bumper stickers using our WVF or HPGW media.
- ✓ Creative window stickers using our Ultra Cling products.
- ✓ Production labels for your business's product using any of our high quality label media.
- ✓ Interesting magnetic automobile signs made with our magnetic kits.
- ✓ Your magnetic business cards
- ✓ The artwork or photos our over-laminate is protecting.
- ✓ Spooky Halloween projects created for or by the kids using our Glow in the Dark media.
- ✓ The temporary tattoo that made your costume a hit at the big party.

The top three images will be voted on by our employees. The winner will receive a \$50 HPS gift certificate and the remaining two finalists will receive a \$25 HPS gift certificate.

Submit your entry by e-mailing it in .jpg format to contest@papilio.com

Good luck, we can't wait to see your creations!

Print your own professional looking window decals.

Papilio™ Ultra Cling Car Window Film & Window-Masking Spray

Papilio™

Make window decals using our Ultra Cling Car Window Film for Inkjet & Laser printers in combination with our Window Masking Spray.

To make car window decals:

- 1) Order our Clear Ultra Cling. (For inkjet or laser printers)
- 2) Print a mirror image on the clear ultra cling.
- 3) Spray the artwork with the white window masking spray.
- 4) When you peel off the cling liner, your artwork will appear vivid on the white background as seen through the "ultra cling" side.
- 5) Apply to the inside of any window for a professional looking decal.

Our Papilio Ultra Cling is covered on one side by a printable coating and on the other by a special cling substance that uses revolutionary "micro-spear technology" to CLING to substrates. It holds like a regular adhesive but when it comes times to remove the label it peels effortlessly off of almost any substrate. Similar to our Cling Tack Media but more advanced and safer on delicate substrates than even our ultra low peel adhesive.

Ultra Cling is useable on almost any substrate where as Static Cling is limited to glass or glossy finished items only.

PGA

Inkjet High-Gloss Self-Adhesive Heavy Photo Paper

Item Code	PGA	Media Thickness	110 lbs	PGA8511G	10 sheets 8.5" X 11"	\$11.25
Type:	Inkjet (Dye based and Solvent)	Liner	96 #	PGA8511KH	100 sheets 8.5 X 11"	\$78.50
Color	Glossy White	Total thickness	15.0 Mil			
Adhesive	Workable but then Permanent	Instructions	Included			

Our premium quality high gloss photo paper features a micro porous coating to give you photos that are not only instantly dry but also waterproof and smudge proof. Compatible with both solvent and dye based inkjet printers. Special "workable" adhesive allows for removal and repositioning of your photo after mounting without damage to either the photo or the substrate.

SGA

Inkjet Satin-Gloss Self-Adhesive Photo Paper

Item Code	SGA	Media Thickness	8.0 Mil	SGA8511G	10 sheets 8.5" X 11"	\$11.25
Type:	Inkjet (Dye based and Solvent)	Liner	96 #	SGA8511KH	100 sheets 8.5 X 11"	\$78.50
Color	Glossy White	Total thickness	15.0 Mil			
Adhesive	Workable but then Permanent	Instructions	Included			

The same premium quality photo paper as our PGA media but with a satin-gloss finish. Same great workable adhesive as our PGA.

PGF

Inkjet Photo Glossy Self-Adhesive Film

Item Code	PGF	Media Thickness	3.0 Mil	PGF8511G	10 sheets 8.5" X 11"	\$12.65
Type:	Inkjet (Dye based)	Liner	96 #	PGF8511KH	100 sheets 8.5 X 11"	\$98.90
Color	High Glossy White	Total thickness	10.5 Mil	PGF1117KH	100 sheets 11" X 17"	\$197.80
Adhesive	Workable	Instructions	Included			

A special white film that is so thin it is almost transparent. Ideal for use when you need a look in between clear and white.

IHGSS

Inkjet Holographic Silver-Shine Self-Adhesive Film

Item Code	IHGSS	Media Thickness	3.0 Mil	IHGSS8511G	10 sheets 8.5" X 11"	\$11.65
Type:	Inkjet (Dye based)	Liner	90 #	IHGSS8511KH	100 sheets 8.5 X 11"	\$93.20
Color	Metallic High Gloss	Total thickness	11.5 Mil			
Adhesive	Permanent	Instructions	Included			

This solid silver film reflects a dazzling rainbow of colors when held at an angle.

IHGSD

Inkjet Holographic Star-Dust Self-Adhesive Film

Item Code	IHGSD	Media Thickness	3.0 Mil	IHGSD8511G	10 sheets 8.5" X 11"	\$11.65
Type:	Inkjet (Dye based)	Liner	90 #	IHGSD8511KH	100 sheets 8.5 X 11"	\$93.20
Color	Metallic High Gloss	Total thickness	10.0 Mil			
Adhesive	Permanent	Instructions	Included			

This solid silver film features a pattern of fine specks and reflects a dazzling rainbow of colors when held at an angle.

IHGBL

Inkjet Holographic Bubbles Self-Adhesive Film

Item Code	IHGBL	Media Thickness	3.0 Mil	IHGBL8511G	10 sheets 8.5" X 11"	\$11.65
Type:	Inkjet (Dye based)	Liner	90 #	IHGBL8511KH	100 sheets 8.5 X 11"	\$93.20
Color	Metallic High Gloss	Total thickness	10.5 Mil			
Adhesive	Permanent	Instructions	Included			

This solid silver film features a pattern of small circles and reflects a rainbow of colors when held at an angle.

IHGSG

Inkjet Holographic Glitter Self-Adhesive Film

Item Code	IHGSG	Media Thickness	3.0 Mil	IHGSG8511G	10 sheets 8.5" X 11"	\$11.65
Type:	Inkjet (Dye based)	Liner	90 #	IHGSG8511KH	100 sheets 8.5 X 11"	\$93.20
Color	Metallic High Gloss	Total thickness	10.0 Mil			
Adhesive	Permanent	Instructions	Included			

This solid silver film features a pattern of small squares and reflects a rainbow of colors when held at an angle.

**Papilio™
Liquid Urethane Coating**

Papilio™

Our clear liquid urethane is perfect for making permanent production decals.

The most durable and strongest top coating available for use with our PAS decal paper or as a top coat for any other media or finish. Ideal for making permanent production decals.

So flexible that it can even be used on vinyl banners, our Liquid Urethane Coating is also scratch resistant and extremely strong.

The instruction for our PAS paper recommend printing your image in "Mirror", or flipped horizontally and then applying your decal face down. This is important for two reasons:

- a) To allow the decal film to protect the ink (the image)
- b) To make the decal more compatible with various top coatings, especially if using an Alps printer. The Alps ink reacts with most any clear spray, other than a few types of artistic fixatives which offer poor protection.

After applying the decal face down it is recommended that you then apply a clear finish, as the PAS film (which protects the ink if the decal if applied face down) can handle almost any clear finish on the market. But now, by using our urethane over-laminate you no longer have to apply the decal face down when using a color laser printer or an Alps printer.

But why use Papilio Liquid Urethane instead of an epoxy or similar product you can find at the local hardware store?

There are 3 reasons:

- 1) Durability.
- 2) Flexibility.
- 3) Strength.

No epoxy known will offer both the strength and flexibility of our urethane. The epoxies sold in hardware stores are also not designed to perform as a thin film. Using epoxy you may encounter the following problems:

Epoxy will:

- 1) "Yellow" (Turn yellow after a few months or one or two years)
- 2) "Craze" (Develop a fine haze of hairline cracks, due to a lack of flexibility).
- 3) "Delaminate" (turns milky white and loses strength when soaked for an extended period of time, due to poor water resistance).

Also note that epoxy will instantly smudge Alps MD series ink and even some color laser toners, making it useable as an over-laminate only if the decal is applied face down. But, as mentioned above most epoxy makes a poor over-laminate due to yellowing and crazing. Our liquid urethane is now being used by scale model artists, automobile and motorcycle detailing shops, and as a permanent top coating for decals and artwork.

Instructions:

Never work with this urethane if the temperature is below 72°F.

Ideal mixture ratio = 85% Part A to 15% Part B or Mix 1 Part B to 5 Parts A for a faster curing time.

Mix only the amount you intend to use.

Mix together in a small disposable container then pour the combined mixture into another container continuing to stir for a few minutes.

Let sit for 15 minutes before use.

Pot life = 3 Hours (Depends on humidity/temperature).
Curing time is 6 to 8 hours, and reaches full strength in a full days.

Use Acetone for cleanup if required. We encourage the use of disposable mixing sticks, cups, and foam pads. Foam pads are available from HPS.

RDS

Rubber Decal Squeegee

Item Code	RDS314
Type:	Decal Mounting Squeegee
Use with:	Water-Slide Decal Paper
Price:	\$3.65

A simple yet critical tool for use when applying water slide decals to any substrate. Consider using a squeegee for applying laser printer bumper stickers as well, when using an application fluid.

PDF

Decal Fixative / Decal Clear Protective Coating

Item Code:	PDF
Type:	Clear Protective Covercoat / Fixative
Use on:	Water-Slide Decal paper.
Can Size:	4 fl oz
Note:	Can only be shipped by UPS Ground
Price:	\$7.26

Use our state of the art clear decal solution either with our PPF paper or as a fixative for our IAS paper. Make a thin yet strong decal film with this superior decal material, so that you can slide your artwork onto most any solid non-porous surface.

UOL

Liquid Urethane Laminate & Finishing Coating

Item Code:	UOL
Type:	Clear Finishing Coating
Use on:	Almost any substrate.
Can Size:	Part A 8 fl oz Part B 2 fl oz
Note:	Can only be shipped by UPS Ground
Price:	Part A: \$16.25 Part B: \$12.25

Give almost any substrate a protective coating with this extremely durable over-laminate. Use this product to protect nearly anything from graphics and labels on fishing rods, motorcycle helmets & gas tanks, aircraft, radio controlled models, even bumper stickers. Many small arts and crafts artists use this product on their products.

DMF

Clear Decal Mounting Fluid

Item Code	DMF	DMF2FLOZ	2 Fl oz bottle	\$3.65
Type:	Decal Mounting Fluid	DMF32FLOZ	32 Fl oz bottle	\$21.45
Use on:	Most substrates	DMF128FLOZ	128 Fl oz bottle	\$89.25
Note	Must be shipped UPS Ground			

Make application of large water slide decals a breeze with our clear decal mounting fluid. Using this product makes the substrate slippery, allowing for precise placement of your decal while at the same time protecting the decal from the accidental tearing that can occur when using a rubber decal squeegee.

DEAF

Dry Erase Adhesive Film

Item Code	DEAF			
Type:	Dry Erase Over-laminate			
Color	Clear			
Adhesive	Permanent			

With this self-adhesive film turn anything into a dry erase surface. Perfect for presentations, school projects, or crafts.

TAH

Transfer Adhesive Sheets

Item Code	TAH	TAH9512G	10 sheets 9.5" X 12"	\$11.86
Type:	Transfer Adhesive Sheets	TAH9512-25	25 sheets 9.5" X 12"	\$23.75
Color	Clear	TAH9512KH	100 sheets 9.5" X 12"	\$57.20
Adhesive	Permanent			

Make any film, thin, or flat object self-adhesive without any special equipment, using our transfer adhesive sheets. A thin layer of adhesive sandwiched between two release liners. This film will not migrate and spoil photos or paper. Ship your creations with this removable self-adhesive and they'll be ready for mounting with no fuss.

IHGHP

Inkjet Holographic Hyper-Plaid Self-Adhesive Film

Item Code	IHGHP	Media Thickness	3.0 Mil	IHGSG8511G	10 sheets 8.5" X 11"	\$11.65
Type:	Inkjet (Dye based)	Liner	90 #	IHGSG8511KH	100 sheets 8.5 X 11"	\$93.20
Color	Metallic High Gloss	Total thickness	10.5 Mil			
Adhesive	Permanent	Instructions	Included			

This solid silver film features a pattern of small squares & lines and reflects a dazzling rainbow of colors when held at an angle.

IAS

Inkjet Clear Water-Slide Decal Paper

Item Code	IAS	Media Thickness		IAS851155	10 sheets 8.5" X 11"	\$8.98
Type:	Inkjet (Dye based)	Liner		IAS8511K50	50 sheets 8.5 X 11"	\$40.37
Color	Clear	Total thickness	8.0 Mil	IAS8511KH	100 sheets 8." X 11"	\$72.00
Adhesive	Permanent	Instructions	Included	IAS8511T	1000 sheets 8.5" X 11"	\$664.00

Make water-slide decals for decorative items such as: wax candles, scale models, miniature replicas, wood items, plastic, glass, marble, and much more. A clear sealer or clear acrylic spray must be used with this item. For optimal results we recommend Papilio liquid (page 20) or spray fixative (page 18).

WIAS

Inkjet White Water-Slide Decal Paper

Item Code	WIAS	Media Thickness		WIAS8511G5	5 sheets 8.5" X 11"	\$8.98
Type:	Inkjet (Dye based)	Liner		WIAS8511KK	10 sheets 8.5 X 11"	\$14.25
Color	White	Total thickness	8.0 Mil	WIAS8511K25	25 sheets 8.5" X 11"	\$28.75
Adhesive	Permanent	Instructions	Included	WIAS1319KH	100 sheets 8.5" X 11"	\$80.00

The same great media as our IAS but with a white film rather than clear.

IRO

Inkjet Rub-On Transfer Decal Paper

Item Code	IRO	Media Thickness	NA	IRO8511KK	10 sheets 8.5" X 11"	\$12.65
Type:	Inkjet (Dye based)	Liner		IRO8511KH	100 sheets 8.5 X 11"	\$86.45
Color	Clear	Total thickness	6.5 Mil			
Adhesive	NA (Used with rub on tack)	Instructions	Included			

Perfect for substrates that may not accept water-slide decals, or if clear inkjet vinyl is too thick. Examples are: un-painted wood, marble, slate, leather, paper, and some plastic substrates.

ABL

Inkjet Self-Adhesive Backlit Film

Item Code	ABL	Media Thickness	3.5 MIL	ABL8511G	10 sheets 8.5" X 11"	\$14.25
Type:	Inkjet (Dye based)	Liner	90 #	ABL8511KH	100 sheets 8.5 X 11"	\$124.25
Color	Matte White	Total thickness	10.5 Mil			
Adhesive	Permanent	Instructions	Included			

Use this media together with a light source for dazzling back-lit displays. This media is a specially coated PET film with a matte white coating and an adhesive that is easy to apply to glass without trapping air bubbles.

IGDP

Inkjet Glow in the Dark Self-Adhesive Vinyl

Item Code	IGDR	Media Thickness	7.0 Mil	IGDP8511G5	5 sheets 8.5" X 11"	\$11.65
Type:	Inkjet (Dye based)	Liner	90#	IGDP8511KK	10 sheets 8.5 X 11"	\$19.95
Color	White/Green	Total thickness	14.5 Mil			
Adhesive	Permanent	Instructions	Included			

The items printed on this media will glow in the dark. Great for creating novelty items and unique production stickers. Featuring our ultra-removable adhesive.

WFM

Inkjet Waterproof Magnetic Kit. Film & Magnetic

Item Code	WFM	Media Thickness	3 MIL & 30MIL	WFM8511GK	5 sheets 8.5" X 11"	\$12.45
Type:	Inkjet (Dye based & Solvent)	Liner	Film 90 #	WFM851125	25 sheets 8.5 X 11"	\$52.91
Color	Matte White	Total thickness	33 MIL	WFM851125KH	100 sheets 8.5" X 11"	\$175.00
Adhesive	N/A	Instructions	Included			

This kit includes our 8.5" X 11" Inkjet waterproof self-adhesive vinyl, and our 30 Mil thick 9.5" X 12" heavy duty flexible magnetic media.

Call for Pricing & Availability

Papilio™ Temporary Tattoo Paper & Adhesive Sheets

Create temporary tattoos limited only by your imagination!

Tattoo preparation:

- 1) On the glossy side of the media, print a mirror image (if the tattoo contains text) of your art using settings for “transparency” media and “normal” resolution.
- 2) After a successful test print, print on the temporary tattoo paper. Let the ink dry for at least 10 minutes before use.

Tattoo Transfer Adhesive Instructions:

- 1) After printing, remove one liner and press the adhesive sheet firmly onto the tattoo (tattoo paper).
- 2) Peel off the other clear liner before pressing the tattoo onto the skin.
- 3) Soak the paper with warm water. Wait 20-30 seconds then slide the paper away. If the paper does not move freely the wait a bit longer.

Please note that some individuals may develop a reaction to even a medical grade glue. Do not use this product if you are pregnant or nursing a baby. If you do not accept full responsibility for the use of this product please return the unopened package for a full refund.

ITT

Inkjet Temporary Tattoo Media

Item Code	ITT	Media Thickness		ITT8511GK	5 sheets 8.5" X 11" KIT	\$11.33
Type:	Inkjet Temporary Tattoo	Liner		ITT8511K100	100 sheets 8.5" X 11"	\$112.50
Color	Glossy White	Total thickness	8.5 Mil	ITT8511K500	500 sheets 8.5" X 11"	\$531.24
Adhesive	NA	Instructions	Included			

Our inkjet temporary tattoo media. The kit includes 5 sheets of both the tattoo media and the adhesive sheets. The quantities of 100 and 500 include only the media, adhesive sheets must be ordered separately.

PTT

Laser Temporary Tattoo Media

Item Code	PTT	Media Thickness		PTT8511GK	10 sheets 8.5" X 11" KIT	\$16.00
Type:	Oil Fuser Laser Printers	Liner		PTT851150	50 sheets 8.5" X 11"	\$36.54
Color	Glossy White	Total thickness	8.5 Mil	PTT8511500	500 sheets 8.5" X 11"	\$99.87
Adhesive	NA	Instructions	Included			

Our selected laser printer temporary tattoo media. For use in laser printers which have an oil fuser unit ONLY. Do not use in newer, high heat laser printers. The kit includes 10 sheets of both the tattoo media and the adhesive sheets. The quantities of 50 and 500 include only the media, adhesive sheets must be ordered separately.

TTA

Adhesive Sheets for Temporary Tattoo Media

Item Code	TTA	Media Thickness		TTA8511KH	100 sheets 8.5" X 11"	\$64.60
Type:	Tattoo Media Adhesive Sheets	Liner		TTA8511KH5	500 sheets 8.5" X 11"	\$265.61
Color	Glossy Clear	Total thickness	5.5 Mil			
Adhesive	Temporary	Instructions	Included			

Adhesive sheets for use with our temporary tattoo media. These sheets feature two release liners, eliminating the need for non stick paper when making your tattoos. Just peel away one liner and adhere the sheet to the tattoo paper (after printing) and leave the other liner in place to peel off just before applying to skin.

Papilio™ Clear-Coating UV-Protective Coating Type LLA5000

Papilio™

Give your media enhanced ultraviolet durability, chemical, water, and abrasion resistance.

Features:

Papilio LLA5000 contains state of the art UV inhibitors. Provides a protective topcoat for when UV protection, mar, abrasion, and chemical resistance is required. Can be used on most inkjet output including water sensitive media.

Directions:

Shake well before use. Always apply to a clean and fully dried surface. Hold nozzle 3 to 6 inches from the image to be coated. Apply one or two medium to wet coats. Allow 3 to 5 minutes drying time between coats.

- ✓ Provides protection for WATER-SENSITIVE media and output; such as dye-based, pigmented, piezo and paper, plastic canvas, pressure sensitive vinyl, banners, and vinyl awnings.
- ✓ Resists plasticizer migration. Ideal for use on vinyl substrates.
- ✓ Non-yellowing.
- ✓ Levels well to assure a smooth coating.
- ✓ Flexible—excellent top-coat for banners.
- ✓ Excellent block resistance.
- ✓ Effective on most painted surfaces.
- ✓ Enhances appearance.
- ✓ Accentuates color “pop” on pigmented and dye-based ink jet applications.

HPS LLC is a main manufacturer and distributor in the USA not only of digital media but also of associated finishing films, coatings, and other products for the desktop publishing industry. To see our complete product selection please go to our informational site www.papilio.com.

Specialty Aerosol Products.

HPS LLC now not only offers you the largest selection of specialty printable media, we have now taken the next step in order to provide the desktop publishing industry with relevant and important products to finish the job. Our specialty aerosol products range from an optically clear pressure sensitive adhesive to our new aerosol decal fixative specially formulated for HPS LLC to provide flexible decal film guaranteed to remain clear and flexible for up to 70 years. Many of the aerosol products you find here are not available anywhere else.

PWMS

White Window-Masking Spray

Item Code:	PWMS6OZ
Type:	Aerosol Masking Spray
Use on:	Clear Laser or Inkjet Ultra Cling Media
Can Size:	6 fl oz / 235ml
Note:	Can only be shipped by UPS Ground
Price:	\$3.45

Use this spray with our Ultra Clear Cling films to make window stickers. Print a mirror image on our Ultra Cling, then use this spray to make the sticker readable from the outside of the window.

SA864

Clear Rub on Tack

Item Code:	SA864-6
Type:	Aerosol Rub on Tack
Use on:	Almost any substrate
Can Size:	6 fl oz. & 12 fl oz.
Note:	Can only be shipped by UPS Ground
Price:	6 oz: \$5.75 12 oz: \$11.65

Make any film or glossy paper self-adhesive using our rub on tack. Perfect to use on substrates that must remain transparent. Also, use this adhesive for general arts and crafts since it will work on most any substrate.

LLA

Clear UV Laminate Spray

Item Code:	LLA5000
Type:	UV Protective Aerosol Spray
Use on:	Dye based printed inkjet images
Can Size:	12 fl oz.
Note:	Can only be shipped by UPS Ground
Price:	\$12.97

Our UV laminate spray protects your art graphics and production labels. Intended for use with graphics printed on dye based inkjet printers.

ASCF

Clear Flexible Film Forming Fixative

Item Code:	ASCF
Type:	UV Protective Aerosol Spray
Use on:	Dye based printed inkjet images
Can Size:	12 fl oz.
Note:	Can only be shipped by UPS Ground
Price:	\$12.97

At last, our state of the art clear decal solution is available in a handy aerosol form. Use this spray with our PPF paper or as a fixative for our IAS paper. Use this aerosol to make a thin yet strong decal film, so you can slide your art-work onto most any solid nonporous surface.

Aerosol products sold by HPS LLC are for professional use only. Some Aerosol products may be sold only to qualified professionals. Aerosol products are only shipped by UPS ground. We do NOT ship aerosol product overseas, to Canada, or Alaska. MSDS sheets are available from HPS LLC.

Aqua Slide & Rub-On Decal Paper

PAPILIO™

Our Water-Slide paper is available for dye based inkjet as well as desktop color laser printers.

IAS Our original water slide decal paper coated for use in Inkjet printers. This media will accept "highest" DPI resolution printing for clear, sharp images. To ensure good results we recommend the use of our Papilio Decal Fixative as we can not guarantee satisfactory results from any other commercially available acrylic or oil enamel aerosol products. We encourage the use of the Papilio Decal Mounting Fluid as well as the Rubber Decal Squeegee (Page 20) for best results.

PAS/2 Our original Papilio Aqua Slide paper has been unchanged since 1994. The PAS/2 paper can be used in most color laser printers, except some Hewlett Packard models.

PAS/4 Similar to our PAS/2 media but with a slightly stiffer coating.

PAS/N Like our PAS/2 media but with a softer film that can be formed onto slightly curved items using a heat gun or even a hair dryer.

PAS/Z The PAS/Z paper is designed for use in the new high heat desktop color laser printers such as the HP 2550. The PAS/2, PAS/4, PAS/N and PAS/Z papers do NOT require the decal fixative, but we strongly recommend the Papilio Decal Mounting Fluid & Rubber Decal Squeegee (Page 20).

IRO An ideal media for transferring images to substrates that may not accept water-slide decal paper, or where clear inkjet vinyl is too thick. Examples are: un-painted wood, marble, slate, leather, paper, and some plastic substrates that may not accept water slide decals. Our rub-on decal paper must be used with our Rub-On Tack (Page 18).

HPS LLC is a main manufacturer and distributor in the USA of water-slide decal paper for small productions as well as for the arts and crafts industry. To see our entire product selection please go to our informational web site, located at www.papilio.com.

Inkjet Printable Glossy White & Matte White Flexible Magnetic Sheets.

Make professional looking refrigerator magnets right on your desk top by printing directly onto our magnetic sheets using your inkjet printer. At almost 10 Mil thick our inkjet magnetic paper is up to three times thicker than some magnetic paper sold in office warehouse stores and other large retail outlets, and yet is still thin enough to feed through all popular inkjet printers without problems.

GFMS

Inkjet Glossy White Flexible Magnetic Sheets.

Item Code	GFMS	Media Thickness	9.8 MIL	GFMS85116	6 sheets 8.5" X 11"	\$10.95
Type:	Inkjet (Dye based and solvent)	Liner	N/A	GFMS851125	25 sheets 8.5 X 11"	\$29.88
Color	Glossy white	Total thickness	9.8 MIL	GFMS8511100	100 sheets 8.5" X 11"	\$92.50
Adhesive	N/A Magnetic material	Instructions	Included			

High quality, glossy, flexible, inkjet magnetic paper. Our special "microporous" coating dries instantly and is smudge proof and even water resistant. 100% made in the USA.

MFMS

Inkjet Matte White Flexible Magnetic Sheets.

Item Code	MFMS	Media Thickness	9.8 MIL	MFMS85116	6 sheets 8.5" X 11"	\$9.98
Type:	Inkjet (Dye based and solvent)	Liner	N/A	MFMS851125	25 sheets 8.5 X 11"	\$23.84
Color	Matte white	Total thickness	9.8 MIL	MFMS1117KH	100 sheets 8.5" X 11"	\$74.00
Adhesive	N/A Magnetic material	Instructions	Included			

The same quality media as our GFMS but with a matte finish. For best results, use an over-laminate if needed.

Inkjet Printable Die-Cut Flexible Magnetic Business Cards.

Print directly onto our magnetic business card sheets to produce business cards customers will hold on to. More likely to be saved than normal cards, magnetic cards have a way of staying in place a very long time once stuck onto a refrigerator or other metal surface. Each sheet is 10 business cards. Most business and graphic design programs have built in templates to correctly print your business cards onto this industry standard layout.

GMC10UP

Inkjet Glossy White Flexible Magnetic Business Cards

Item Code	GMC10UP	Media Thickness	9.8 MIL	GMC10UP6	6 sheets 60 Business Cards	\$12.45
Type:	Inkjet (Dye based and solvent)	Liner	N/A	GMC10UP25	25 sheets 250 Business cards	\$47.65
Color	Glossy white	Total thickness	9.8 MIL	GMC10UP100	100 sheets 1000 Business cards	\$171.54
Adhesive	N/A Magnetic material	Instructions	Included			

Use this glossy white media to create your own magnetic business cards. These sheets are die cut to break apart easily and leave completely smooth edges for a professional look and feel.

MMC10UP

Inkjet Matte White Flexible Magnetic Business Cards

Item Code	MMC10UP	Media Thickness	9.8 MIL	MMC10UP6	6 sheets 60 Business Cards	
Type:	Inkjet (Dye based and solvent)	Liner	N/A	MMC10UP25	25 sheets 250 Business cards	\$32.65
Color	Matte white	Total thickness	9.8 MIL	MMC10UP100	100 sheets 1000 Business cards	
Adhesive	N/A Magnetic material	Instructions	Included			

The same quality media as our GMC10UP but with a matte white finish.

PAS/2

Laser Water-Slide Decal Paper

Item Code	PAS/2	Media Thickness	3 lbs	PBFG8511G	10 sheets 8.5" X 11"	\$11.85
Type:	Oil Fuse Laser and Dry Resin	Liner	90 #	PBFG851125	25 sheets 8.5 X 11"	\$23.75
Color	Glossy White	Total thickness	9.0 Mil	PBFG8511KH	100 sheets 8.5 X 11"	\$57.20
Adhesive	Permanent	Instructions	Included			

Our original Aqua Slide paper, unchanged since 1994. Ideal for use in most color laser printers. However, for HP laser printers please see our PAS/Z. A decal fixative is not required, but we strongly encourage use of our Papilio Decal Mounting Fluid (page 20).

PAS/4

Laser Water-Slide Decal Paper

Item Code	PAS/4	Media Thickness	3 lbs	PAS48511G	10 sheets 8.5" X 11"	\$12.65
Type:	Oil Fuse Laser and Dry Resin	Liner	90 #	PAS48511K25	25 sheets 8.5 X 11"	\$24.95
Color	Glossy White	Total thickness	16.0 Mil	PAS48511KH	100 sheets 8.5 X 11"	\$84.65
Adhesive	Permanent	Instructions	Included			

Another fine Papilio aqua slide decal paper. Very similar to our original PAS/2 media, but with a slightly stiffer coating.

PAS/N

Laser Water-Slide Decal Paper

Item Code	PAS/N	Media Thickness	3 lbs	PASN8511G	10 sheets 8.5" X 11"	\$14.65
Type:	Oil Fuse Laser and Dry Resin	Liner	90 #	PASN851125	10 sheets 8.5 X 11" Kit	\$24.95
Color	Glossy White	Total thickness	16.0 Mil	PASN8511KH	50 sheets 8.5 X 11"	\$84.65
Adhesive	Permanent	Instructions	Included			

Similar to our PAS/2 media, this media features a softer film which can be more easily formed to slightly curved surfaces when used in combination with a heat gun, or even a hair dryer. A decal fixative is not required, but we strongly encourage the use of our Papilio decal mounting fluid (page 20).

PBFG

Laser Poly Base Self-Adhesive Film

Item Code	PBFG	Media Thickness	3 lbs	PBFG8511G	10 sheets 8.5" X 11"	\$11.85
Type:	Oil Fuse Laser and Dry Resin	Liner	96 #	PBFG851125	25 sheets 8.5 X 11"	\$23.75
Color	Glossy White	Total thickness	9.0 Mil	PBFG8511KH	100 sheets 8.5 X 11"	\$57.20
Adhesive	Permanent	Instructions	Included			

A poly-propylene film with a glossy topcoat to improve the printability with Alps MD, Xerox Phaser, and other dry ink printers, and also most other older color laser printers. NOT FOR USE IN HP COLOR LASER PRINTERS OR NEWER COLOR LASER PRINTERS.

PPF

Perga Flat Un-Coated Water Transfer Paper

Item Code	PPF	Media Thickness	3 lbs	PPF851110	10 sheets 8.5" X 11"	\$11.75
Type:	Oil Fuse Laser and Dry Resin	Liner	90 #	PPF8511GK	10 sheets 8.5 X 11" Kit	\$16.24
Color	Glossy White	Total thickness	16.0 Mil	PPF851150	50 sheets 8.5 X 11"	\$36.56
Adhesive	Permanent	Instructions	Included			

A basic uncoated water-slide decal paper of which HPS LLC is the largest supplier in the USA. Use this media along with over glaze colors for silk screen printing to make ceramic decals. This media may also be used for temporary tattoos when used with a suitable top coat. Not to be confused with our pre-coated water-slide paper for inkjet and laser printers.

CTM

Laser Cling tack Self-Adhesive Media

Item Code	CTM	Media Thickness	3 lbs	CTM8511G	10 sheets 8.5" X 11"	\$11.85
Type:	Oil Fuse Laser and Dry Resin	Liner	96 #	CTM851125	25 sheets 8.5 X 11"	\$23.75
Color	Glossy White	Total thickness	11.0 Mil	CTM8511KH	100 sheets 11" X 17"	\$57.20
Adhesive	Permanent	Instructions	Included			

Cling tack media in a matte white. Specially designed for use in dry ink printers like the Xerox Phaser, Minolta QMS, and Minolta Magi-color II. Not for use in printers that do not have an oil fuser unit.

LHSS

Laser Holographic Silver Shine Self-Adhesive Film

Item Code	LHSS	Media Thickness	3.0 Mil	LPHSS8511G	10 sheets 8.5" X 11"	\$14.65
Type:	HP2550 & Konica 2300	Liner	96 #	LPHSS8511KK	100 sheets 8.5 X 11"	
Color	Metallic High Gloss	Total thickness	10.0 Mil			
Adhesive	Permanent	Instructions	Included			

This solid silver film reflects a dazzling rainbow of colors when held at an angle.

LHSD

Laser Holographic Star-Dust Self-Adhesive Film

Item Code	LHSD	Media Thickness	3.0 Mil	LHSD8511G	10 sheets 8.5" X 11"	\$11.65
Type:	HP2550 & Konica 2300	Liner	90 #	LHSD8511KH	100 sheets 8.5 X 11"	\$93.20
Color	Metallic High Gloss	Total thickness	10.0 Mil			
Adhesive	Permanent	Instructions	Included			

This solid silver film features a pattern of fine specks and reflects a dazzling rainbow of colors when held at an angle.

LHBL

Laser Holographic Bubbles Self-Adhesive Film

Item Code	LHBL	Media Thickness	3.0 Mil	LHBL8511G	10 sheets 8.5" X 11"	\$11.65
Type:	HP 2550 & Konica 2300	Liner	90 #	LHBL8511KH	100 sheets 8.5 X 11"	\$93.20
Color	Metallic High Gloss	Total thickness	10.0 Mil			
Adhesive	Permanent	Instructions	Included			

This solid silver film features a pattern of small circles and reflects a rainbow of colors when held at an angle.

LHGL

Laser Holographic Glitter Self-Adhesive Film

Item Code	LHGL	Media Thickness	3.0 Mil	LHGL8511G	10 sheets 8.5" X 11"	\$11.65
Type:	HP2550 & Konica 2300	Liner	90 #	LHGL8511KH	100 sheets 8.5 X 11"	\$93.20
Color	Metallic High Gloss	Total thickness	10.0 Mil			
Adhesive	Permanent	Instructions	Included			

This solid silver film features a pattern of small squares and reflects a rainbow of colors when held at an angle.

LHHP

Laser Holographic Hyper-Plaid Self-Adhesive Film

Item Code	LHHP	Media Thickness	3.0 Mil	LHHP8511G	10 sheets 8.5" X 11"	\$11.65
Type:	HP2550 & Konica 2300	Liner	90 #	LHHP8511KH	100 sheets 8.5 X 11"	\$93.20
Color	Metallic High Gloss	Total thickness	10.0 Mil			
Adhesive	Permanent	Instructions	Included			

This solid silver film features a pattern of small squares & lines and reflects a dazzling rainbow of colors when held at an angle.

LHGF

Laser Gold Metallic Self-Adhesive Film

Item Code	LHGF	Media Thickness	3.0 Mil	LHGF8511G5	5 sheets 8.5" X 11"	\$9.89
Type:	HP2550 & Konica 2300	Liner	90 #	LHGF8511KK	10 sheets 8.5 X 11"	\$14.65
Color	High Glossy Mirror Gold	Total thickness	10.0 Mil	LHGF8511K100	100 sheets 8.5 X 11"	\$119.00
Adhesive	Permanent	Instructions	Included			

Shiny metallic gold media. Wonderful for printing awards, diplomas, and the like. Works best with black ink, but will also accept colors.

LHSF

Laser Silver Metallic Self-Adhesive Film

Item Code	LHSF	Media Thickness	3.0 Mil	LHSF8511G5	5 sheets 8.5" X 11"	\$9.89
Type:	HP2550 & Konica 2300	Liner	90 #	LHSF8511KK	10 sheets 8.5 X 11"	\$14.65
Color	High Glossy Mirror Silver	Total thickness	10.0 Mil	LHSF8511K100	100 sheets 8.5 X 11"	\$119.00
Adhesive	Permanent	Instructions	Included			

Shiny metallic silver media. This media works better for color images than our LHGF, yet still makes excellent black images.

GLGC

Laser Glossy Clear Self-Adhesive Film

Item Code	GLGC	Media Thickness	2.7 Mil	GLGW8511G	10 sheets 8.5" X 11"	\$10.65
Type:	Most Color Laser Printers	Liner	96 #	HPGC8511KK	100 sheets 8.5 X 11"	\$59.31
Color	Clear	Total thickness	10.0 Mil	HPGC1117KH5	500 sheets 8.5" X 11"	\$280.08
Adhesive	Permanent	Instructions	Included	HPGC1319KH	100 sheets 13" X 19"	

Glossy clear polyester film ideal for making production labels or any permanent marking. This media features a special adhesive that is workable after application and becomes permanent over time, allowing you to correct mistakes made while mounting.

GLGW

Laser Glossy White Self-Adhesive Film

Item Code	GLGW	Media Thickness	2.7 Mil	HPGW8511G	10 sheets 8.5" X 11"	\$14.65
Type:	Most Color Laser Printers	Liner	96 #	HPGW8511KK	100 sheets 8.5 X 11"	\$59.31
Color	White	Total thickness	10.0 Mil	HPGW1117KH	500 sheets 8.5" X 11"	\$282.01
Adhesive	Permanent	Instructions	Included	HPGW1319KH	100 sheets 13" X 19"	

The same quality media as our GLGC, but in white.

GLUC

Laser Clear Glossy Ultra Cling Film

Item Code	GLUC	Media Thickness	2.7 Mil	HPUC8511G	10 sheets 8.5" X 11"	\$11.25
Type:	Most Color Laser Printers	Liner	96 #	HPUC8511KH	100 sheets 8.5 X 11"	\$59.31
Color	Glossy Clear	Total thickness	10.0 Mil	HPUC8511KH5	500 sheets 8.5" X 11"	\$280.08
Adhesive	Ultra Removable Cling	Instructions	Included	HPUC1319KH	100 sheets 13" X 19"	

Clear polyester film that features a special ultra removable adhesive. The perfect media for using inside of car windows and many other substrates where static cling will not adhere. Since laser toner is water fast this product can be used immediately after printing without the need for a waterproofing spray. For use in color laser desktop printers such as the Konica Minolta 2300W. Although this media will work in some Hewlett Packard models, we recommend our HPUC for HP printers. Do NOT use in Okidata or other LED printers.

GLUW

Laser White Glossy Ultra Cling Film

Item Code	GLUW	Media Thickness	2.7 Mil	HPUW8511G	10 sheets 8.5" X 11"	\$14.65
Type:	Most Color Laser Printers	Liner	96 #	HPUW8511KH	100 sheets 8.5 X 11"	\$83.50
Color	Glossy White	Total thickness	10.5 Mil	HPUW1117KH	100 sheets 11" X 17"	
Adhesive	Ultra Removable Cling	Instructions	Included	HPUW1319KH	100 sheets 13" X 19"	

The same quality media as our GLUC but in a white color. For use in color laser desktop printers such as the Konica Minolta 2300W. Although this media will work in some Hewlett Packard models, we recommend our HPUC for HP printers. Do NOT use in Okidata or other LED printers.

PAS/Z

High Heat Laser Water-Slide Decal Paper

Item Code	PAS/Z	Media Thickness	3 lbs	CTM8511G	10 sheets 8.5" X 11"	\$11.85
Type:	HP2550 & Konica 2300	Liner	90 #	CTM851125	25 sheets 8.5 X 11"	\$23.75
Color	Glossy Clear	Total thickness	11.0 Mil	CTM8511KH	100 sheets 11" X 17"	\$57.20
Adhesive	Permanent	Instructions	Included			

Water-slide decal paper specially designed for newer, high heat laser printers such as the Hewlett Packard 2550

JUST ADD COLORS

HPGC

Laser Glossy Clear Self-Adhesive Film

Item Code	HPGC	Media Thickness	2.7 Mil	HPGC8511G	10 sheets 8.5" X 11"	\$11.25
Type:	HP2550 & Konica 2300W	Liner	96 #	HPGC8511KK	100 sheets 8.5 X 11"	\$59.31
Color	Clear	Total thickness	10.0 Mil	HPGC1117KH5	500 sheets 8.5" X 11"	\$280.08
Adhesive	Permanent	Instructions	Included	HPGC1319KH	100 sheets 13" X 19"	

Glossy clear polyester film ideal for making production labels or any permanent marking. This media features a special adhesive that is workable after application and becomes permanent over time, allowing you to correct mistakes made while mounting. Specifically designed for high heat laser printers such as the Hewlett Packard 2550.

HPGW

Laser Glossy White Self-Adhesive Film

Item Code	HPGW	Media Thickness	2.7 Mil	HPGW8511G	10 sheets 8.5" X 11"	\$14.65
Type:	HP2550 & Konica 2300W	Liner	96 #	HPGW8511KK	100 sheets 8.5 X 11"	\$59.31
Color	White	Total thickness	10.5 Mil	HPGW1117KH	500 sheets 8.5" X 11"	\$282.01
Adhesive	Permanent	Instructions	Included	HPGW1319KH	100 sheets 13" X 19"	

The same quality media as our HPGC, but in white.

HPUC

Laser Clear Glossy Ultra Cling Film

Item Code	HPUC	Media Thickness	2.7 Mil	HPUC8511G	10 sheets 8.5" X 11"	\$11.25
Type:	HP2550 & Konica 2300W	Liner	96 #	HPUC8511KH	100 sheets 8.5 X 11"	\$59.31
Color	Glossy Clear	Total thickness	10.5 Mil	HPUC8511KH5	500 sheets 8.5" X 11"	\$280.08
Adhesive	Ultra Removable Cling	Instructions	Included	HPUC1319KH	100 sheets 13" X 19"	

Clear polyester film that features a special ultra removable adhesive. The perfect media for using inside of car windows and many other substrates where static cling will not adhere. Since laser toner is water fast this product can be used immediately after printing without the need for a waterproofing spray. Specifically designed for newer, high heat laser printers such as the Hewlett Packard 2550.

HPUW

Laser White Glossy Ultra Cling Film

Item Code	HPUW	Media Thickness	2.7 Mil	HPUW8511G	10 sheets 8.5" X 11"	\$14.65
Type:	HP2550 & Konica 2300W	Liner	96 #	HPUW8511KH	100 sheets 8.5 X 11"	\$83.50
Color	Glossy White	Total thickness	10.5 Mil	HPUW1117KH	100 sheets 11" X 17"	
Adhesive	Ultra Removable Cling	Instructions	Included	HPUW1319KH	100 sheets 13" X 19"	

The same quality media as our HPUC, but in white. Specifically designed for newer, high heat laser printers such as the Hewlett Packard 2550.

HPSCC

Laser Clear Static Cling Film

Item Code	HPSCC	Media Thickness	7.0 Mil	HPSCC8511G	10 sheets 8.5" X 11"	\$12.85
Type:	HP2550 & Konica 2300W	Liner	10 pt	HPSCC8511KK	25 sheets 8.5 X 11"	\$20.25
Color	Clear	Total thickness	17.0 Mil	HPSCC1117KH	100 sheets 8.5" X 11"	\$84.65
Adhesive	N/A	Instructions	Included	HPSCC1319KH	100 sheets 13" X 19"	

Quality high heat laser printable clear static cling media. For use on substrates such as glass and glossy finished metals. It is important to note that this media must be used indoors, and will not stick to cold glass. If you need cling media for automobiles or outdoor use we recommend our HPUC or HPUW media.

HPSCW

Laser White Static Cling Film

Item Code	HPSCW	Media Thickness	7.0 Mil	HPSCW8511G	10 sheets 8.5" X 11"	\$12.85
Type:	HP2550 & Konica 2300W	Liner	10 pt	HPSCW8511K25	25 sheets 8.5 X 11"	\$20.25
Color	White	Total thickness	17.0 Mil	HPSCW8511KH	100 sheets 8.5" X 11"	\$84.65
Adhesive	N/A	Instructions	Included			

The same quality media as our HPSCC but in white.

Papilio™ Laser Polyester Media

Papilio™

Our Laser Polyester Media is available in glossy white and clear with either a permanent or ultra removable adhesive.

We have adhesive polyester film available for use in most color laser printers. For high heat printers such as the HP2550 use the products beginning with "HP" for most other color laser printers look for our "GL" line (Page 13) .

Ideal for making production labels and permanent markings. The permanent adhesive on our laser polyester allows for removal and repositioning before becoming permanent, to allow for mistakes. Perfect for plastics such as: PVC, HDPE, and LDPE bottles also on glass, metal, most any substrate that will accept adhesive media.

Also available with an ultra removable adhesive for labels that must be safely removed such as temporary labels placed on windows, consumer electronics, etc..

The label on this coffee bag was printed on our HPGC8511 media using a HP2550 desktop color laser printer.

- Media 8.5" X 11"
