

**HYAZ™ Inkjet Media**

**Inkjet Backlit Film**

**Printing and Application Instructions**

- 1) Copy/Print on to the coated side of the media using compatible Inkjet Printer.
- 2) Avoid using high or highest resolution when printing. This media may not be able to handle excessive coverage. Start by using coated film or transparency and regular resolution in your printer driver.
- 3) Print a mirror image. (You must do this if you want the image to be viewed from the glossy side)
- 4) To prevent a paper jam, make sure the media is not bent or warped or corners folded BEFORE loading. Loading by hand ONE SHEET at the time (pressing FF/Ready) is a way to make sure it loads correctly.

**Note:** To judge the quality of the finished printing hold the media up to a light source and view the results from the glossy side.

THIS media is for indoor use ONLY.

**If the label is used temporarily outdoors or**

Item #	IBL-10 10 sheets pack
Media	Back-Lit Film
Media Type	Inkjet
Color	White/ Transparent
Printers	All Inkjet Desk Top Printers
Type of Adhesive	N/A

**in location where the media/image may collect moisture you must use clear spray and Overlaminates.** The Overlaminates must be applied in such way that it prevents water from contacting the label. Clear enamel spray is available in most hardware or automotive parts stores.

For Car window we strongly recommend using our UCF. The UCF (Ultra Cling Film) works in the same way as the static cling but it has a new generation *micro spear coating* that clings to more types of substrates than static cling.

To extend UV resistant of Inkjet media HPS offers Overlaminates with built in UV barrier.

**Printer Settings**

If your printer is not listed here then select transparency and normal resolution.
